Check out this dark red fancy brood cow prospect. She is deep bodied and soggy in her make up with correct structure and very balanced in her type and kind. You can't miss her in the pasture and you can't miss her cow families production history. Coming from our Fire Dance cow family, her great grand dam was a NILE sale graduate in 1996 from Larsen's. Her grand dam was the high selling lot in the 1st ABS sale held during the National Western Stock Show in Denver in 1999 for \$8500. Her dam, an own daughter of Lancer F442 has been a solid producer with a wean ratio of 105 and MPPA of 103. New Light is sired by Andras New Look, a sire who goes back to the Black Angus sire Myt-ty In Focus. New Look is a paternal brother to AI sires New Direction at Genex and Fusion at ABS. He was our pick of the Andras's spring 2012 bull crop. He is siring thick meaty sons and deep easy keeping daughter that are good uddered and appear to be maternally above average. Don't miss this gal, she would be a top addition to any herd and at the end of her lifetime she will have been "worth the chips"
